 India

ABOUT ME

Computer science student with hands-on experience in Python, data/ML workflows, and low-level programming in C and C++. I actively participate in competitive programming. Beyond coursework, I've worked on a research project and several personal builds that I actually care about finishing. I'm drawn to problems that require some thinking before the typing starts, and I prefer understanding a system properly over just making it work.

PROJECTS/WORK EXPERIENCE

ResNet from scratch

CNN Architecture optimization problem

I have made a ResNet from scratch, gave me a deep understanding of deep plain networks and ResNet deep networks, have done some experiments with parameters to suit it to different type of problem in vision architect.

Autograd engine

Autograd engine in python

Autograd engine in python which can be used to train models the accuracy was a observation: Autograd engine in python vs Autograd engine in c++, transferring it to a AutoGrad engine in cpp will be my next project

EDUCATION

Manipal institute of technology
btech in CSE(ongoing)

st. paul school, CBSE
11th and 12th

Podar International school besa
schooling till 10th

SKILLS

- Python
- pytorch
- pandas,numpy
- C
- C++
